

# REPEAT DISPENSING

**From January 2023 we will be reviewing our Repeat Dispensing Policy.**

During this review process we will look at patients who's prescriptions are *NOT* suitable (e.g. medication that is frequently changing)

Going forward patient's suitability for Repeat Dispensing will be assessed at their Annual Review

If you are contacted regarding a prescription that is *no longer suitable* for Repeating Dispensing your Prescription **will still be on repeat**

# REPEAT DISPENSING

**From January 2023 we will be reviewing our Repeat Dispensing Policy.**

**It's important that prescriptions prescribed through the repeat dispensing process (batch prescriptions) are suitable and safe.**

For this reason we are reviewing these prescriptions.

If you are contacted regarding the unsuitability of your prescription, your prescription will still be on repeat.

The only difference is that you must request this every time it is due. This can be done using one of the options listed below.

**This will ensure your request goes to a clinician and the necessary checks are made.**

Going forward, suitability for repeat dispensing will be assessed at annual reviews.
